

Are you an IT professional who enjoys working with complex systems and making sure everything runs smoothly behind the scenes? At Banco di Caribe, you'll play an important role in keeping our payment card systems reliable, secure and up to date.

Payment Card Systems Analyst

As a Payment Card Systems Analyst, you will manage and support daily payment system operations, working with internal systems and external partners to ensure secure, accurate, and uninterrupted transactions.

Key Responsibilities:

- Support the development, setup, and maintenance of payment card systems and related components
- Gather and coordinate business requirements for new features and system improvements
- Monitor system performance, availability, and usage to ensure stability
- Carry out daily operational activities related to payment systems
- Monitor payment processing and transaction flows
- Manage connections with POI (Point of Interaction) devices
- Work with external card networks, switches, and payment gateways
- Configure, maintain and support relevant hardware

Your Profile:

- A Bachelor's degree in an IT-related field
- Knowledge of information and communication systems and/or data processing
- At least three years of experience in banking/payment cards and PCI standards
- A good understanding of payment card processing processes
- Experience working with local and international card payment networks and solutions
- Broad knowledge of payment card technologies and industry solutions
- Strong communication skills in English, Dutch and Papiamentu

What We Offer:

- A meaningful role within a stable and well-established financial organization
- Opportunities to grow and develop within our IT Department
- A supportive, collaborative, and professional work environment
- Competitive employment conditions
- The chance to build your career while working with modern payment technologies
